

FEATURES

- Timeless design
- Strong and durable
- Luxurious marble, stone, and concrete patterns
- Packaged in a kit with all the components for a complete installation, including hardware, fasteners, adhesives, silicone, lippage control, watertight flashing, **EVERYTHING!**
- Innovative, patent-pending, mechanical fastening system attaches the panels to traditional wood stud framing without the need for thinset adhesive or mortar.
- Installed on open stud walls – no need for drywall!
- Use the same kit for any shower up to 60” wide and up to 36” deep.
- Panels are easily trimmed at the jobsite using a hand-held angle grinder.
- Plumbing access holes are easy to cut using a core bit designed for cutting porcelain.
- Can be installed with a tiled shower base or a one-piece modular shower base.
- Shower walls have only one horizontal seam with multiple watertight barriers.
- Compatible with a wide variety of shower niches, soap dishes, and shelves, both recessed and surface mounted.
- Compatible with grab bars with properly installed blocking.
- Compatible with a wide variety of shower pans.
- Backer board permanently adhered to porcelain wall panel.
- Simple installation requires only a trim carpentry or intermediate construction skillset for successful installation. No specialty contractors required!
- Smaller panels are easily installed by one person.
- Typically installed in a single workday or less.
- Shipped in a single crate.
- Crate can be loaded on the installers’ truck with a forklift, then opened and carried in by hand at the jobsite.

BENEFITS

- Easy to clean and maintain. No grout to scrub.
- Patent-pending fastening system eliminates traditional adhesive installation.
- Completely watertight system with only one horizontal seam.
- Panels can be removed and reinstalled for plumbing repairs.
- Panels may be easily replaced in the future for a different look.
- Reusable and sustainable. Panels may be removed and reinstalled elsewhere.
- No thinset adhesive or grout to mix or apply.
- No need to install drywall or backer board.
- No more trips to the hardware store or home improvement store. All components are provided in a single crate.
- Confidence that you are using the correct adhesives, caulks, and fasteners.
- Fast installation. Return the shower to service sooner.
- No more multiple trips to the jobsite.
- No more multiple days of setting tile and grouting.
- Less mess at the jobsite. No mixing or applying adhesive, cutting tile, grouting, etc...
- Easy installation cleanup – use the carton for your debris.
- Save labor. Smaller showers can be installed by one installer.
- Get your installer on their way sooner by loading the crate into the truck with a forklift.
- May qualify for 7-year tax depreciation as “Tangible Property with No Class Life” under the Modified Accelerated Cost Recovery System. By comparison, conventional commercial construction is depreciated over either 27.5 years or 39 years, depending on the building’s intended use. Consult with your accountant, tax professional, or your local IRS office for more information.
