

## SELL SHEET

### Who can use the Synthesis™ Porcelain Shower Surround System?

- The system is designed for a standard 60" x 36" x 96"H shower and is easily trimmed at the job site to fit smaller showers or tub surrounds.
- The system includes two 47-1/4"H panels to be stacked on each wall with a horizontal seam between them. Panels may be trimmed for both width and height to accommodate a wide variety of shower and tub surround applications.
  - Bottom panels may have up to 5" removed from the bottom edge.
  - Top panels may have up to 22" removed from the top edge.
  - Panels may be cut to any width.
- The wall cavities between the studs on the walls that are to receive the porcelain shower wall panels **MUST** be open to allow the mechanical fasteners to engage. Drywall or backer board will interfere with the installation of the system.
- The system can be used with shower doors or shower curtains.
- The system can be used with recessed accessories such as pre-made shower niches and with wall-mounted accessories such as grab bars and soap dishes.
- The system is not currently compatible with built-in shower benches.
- The system is not currently offered with vein matching or book matching from panel to panel.
- The system is not currently offered with vertical seams, although we hope to introduce this option soon.
- The system is not currently offered with a matching ceiling panel, although we hope to introduce this option soon.

### About your Shower Base...

- Your shower base **MUST** have an integral flange/water dam on all sides that are to receive wall panels.
- **Tiled Shower Bases** must be level at the perimeter to avoid an uneven gap between the wall panels and the tiled floor.
- **Modular Shower Bases** must have a level panel ledge, minimum 1-3/4" wide, at all sides that are to receive wall panels. A threshold is not required.

### What we Provide...

We provide a convenient kit that includes all the components and materials for a complete Synthesis™ porcelain shower surround installation. The kit includes (2) 58-1/2"W x 47-1/4"H and (4) 35-7/8"W x 47-1/4"H vitrified 6mm porcelain panels bonded to Schluter® Kerdi-Board with a proprietary marine-grade epoxy adhesive. The installed thickness of the Synthesis™ wall panels is 1-1/4 inches. The kit includes flashing, closed-cell foam gaskets, and all fasteners, spacers, adhesives, and color-matched caulk for a complete installation.

### What you Provide...

- Your own shower base/pan, max 60"W x max 36"D
- Your own shampoo niches, soap dishes, edge trim, grab bars, and accessories
- The labor and tools to install the system

### Availability

Available in ten (10) polished colors and three (3) satin colors, including both stunning natural stone patterns and more contemporary looks.

### Pricing

- The list price for the Synthesis™ porcelain shower surround kit is \$8,000 and is subject to your multiplier.
- All colors and finishes are sold at the same price.
- The net price for the installation kit is \$350 and is not subject to your multiplier.

### Shipping

All products are shipped FOB from our dock in Solon, Ohio.

- The kit is shipped in a 64"L x 52"W x 10"H carton mounted on a custom wood pallet.
  - The receiver must have a forklift or pallet jack available to receive the shipment.
  - Additional freight costs will apply for delivery locations without a truck-height dock.
- The shipping weight is approximately 550 lbs.

Products may also be picked up at our dock.

### Warranty

We provide a robust 10-year product warranty on the Synthesis™ vitrified porcelain panel against material and manufacturing defects under normal use and service. Panel Composite Systems, Inc. warrants to the original end-user that we will repair or replace, at our option, any product found to be defective under normal use and care at no charge for a period of ten years from the date of purchase. This warranty covers the product only and does not cover the labor to remove or reinstall the product.
