RECEIVERS CHARTING WORKSHEET

For most standard installations, width measurements are to be taken at the following heights above the panel ledge for modular one-piece shower pans or from the shower floor for tiled shower pans.

- 83-1/4" high
- 58-1/2" high
- 36-1/4" high
- 11-1/2" high

These heights will need to be modified for installations where the panels are being trimmed for height.
