

SYNTHESIS™

porcelain shower system

BY THE NUMBERS

Three years of exhaustive research and development and a singular focus to make porcelain shower surrounds simple resulted in the formation of Panel Composite Systems, Inc. in April 2022 and the launch of the Synthesis modular porcelain shower surround system later that year. Synthesis simplifies porcelain shower surrounds by providing the product in a convenient kit, by offering all colors at the same price, by eliminating the need for a porcelain fabricator, and by requiring only trim carpentry skills to install. Panel Composite Systems, Inc. manufactures the Synthesis modular porcelain shower surround system in Solon, Ohio.
