Our accessory options are available
in 5 beautiful finishes!

What is Mont Synthesis?

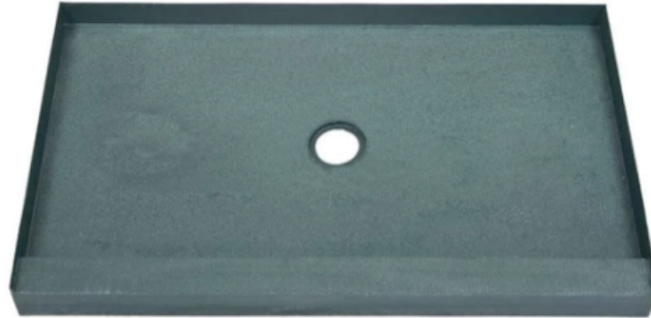

Mont Synthesis is a modular shower surround system that uses marine-grade adhesive technology to bond large-format porcelain panels to a moisture-resistant substrate and a proprietary mechanical fastening system. The panels are then mechanically attached to traditional framing without the use of thinset adhesive.

Why was Mont Synthesis Developed?

Mont Synthesis was developed to be an easy, simple, contractor-friendly shower surround alternative to large-format porcelain installation.

Where Can Mont Synthesis Be Used?

- ◆ Ideal for use in standard-sized, three-wall, alcove showers or any shower where the walls are constructed using traditional framing
- ◆ Offers a luxurious and cost-effective upgrade for standard-sized showers
- ◆ Can be used with most shower pans and many shower accessories

The KBRs Tile-Basin® is a rock-solid alternative to a field-sloped mortar bed. It is specifically designed to protect your shower long term. The patented 1/8" perimeter flange facilitates water taking the path of least resistance directly into the drain. The protective barrier flange is guaranteed to prevent moisture from escaping the system from behind the wall, substrate or sub-floor.
