

## INDUSTRY LEADING

Equipped with our patented perimeter flange and hard curb attachments, the Linear Tile-Basin® comes surface ready with an industry leading PSI rating of 118.

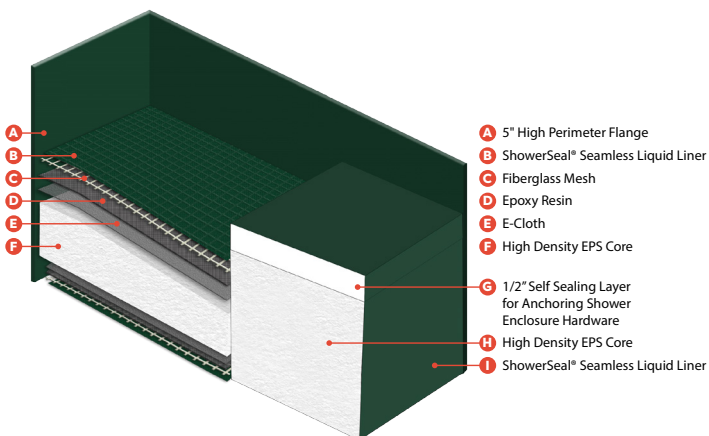

## NO LEAKS. PERIOD.

Our patented leak-proof design makes the KBR'S Linear Tile-Basin® the most trusted factory waterproofed, and ICC approved, tileable shower base in North America.

## CUSTOMIZE IT

Linear Tile-Basin® shower pans are available to be manufactured into unlimited custom sizes (up to 9500 square inches), so you can get it in any size or shape you can imagine.

## FAST & EASY INSTALLATION

Not only is the KBR'S Linear Tile-Basin® a rock-solid alternative to a field-sloped mortar bed, it is also specifically designed to protect your shower long term. By utilizing the patented 1/8" perimeter flange, water will take the path of least resistance directly into your shower drain. Unlike our competitors, our protective barrier flange is guaranteed to prevent moisture from escaping the system from behind the wall, substrate, or sub-floor.
